

AI Server 910

Overview

The Atlas 800 training server (model 9010) is an AI training server running on the Huawei Ascend 910 AI Processor and Intel Cascade Lake processor. The server is designed for public cloud, Internet, carrier, government. Huawei's AT3500 G3 HuaKun AI Inference Server is designed for high-performance AI inference tasks. It integrates multiple high-performance processors such as the Kunpeng 920 and the Ascend 910B, making it ideal for businesses looking for robust computing capabilities. At the heart of Huawei's efforts is the DaVinci core. "DaVinci" and "Davinci" were used throughout the Hot Chips 31 presentation, so we are going to use "DaVinci". Huawei, like many of the companies coming up. Although it costs three times more, and uses 3. It has 32 GB built-in (On-Board/On-Chip) memory with bandwidth up to 1200 GB/s. Ascend 910B, Memory bandwidth, Memory Capacity, FP64 FLOPS, FP32 FLOPS, Tensor FP16 FLOPS, Tensor FP8 FLOPS, Tensor INT16 TOPS, Tensor INT8 TOPS, Tensor INT4 TOPS. launched by. On 8-card Ascend 910B with vLLM serving Qwen3.
