

Aggregation Switch 244

Overview

Fibridge F2S500PS-244 series network switch is a high-performance Ethernet access Managed equipment developed by Beijing Fibridge. It has 24* 10/100/1000 Mbps RJ45 Ethernet interfaces and 4* 1Gigabit FX ports. By bundling multiple network connections into a single high-bandwidth link, aggregation switches help. An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network. The Pro Aggregation does this with it's SFP28 25Gbps ports. An 8-port, Layer 2 switch made for 10G SFP+ connections. These units function in a secure topology, linking to an enterprise backbone or high-capacity network server. The powerful features of QoS and network security make this series. The KGS Fire & Security GE-DSG-244 series is a Layer 2 managed gigabit switch designed to handle extremely large amounts of data.
