

# All-optical-port Layer 3 Switch

## Overview

Deployed as a top-of-rack (ToR) access switch, it supports fiber-optic connectivity for multiple servers in data centers. This configuration meets the low-latency transmission requirements of servers and storage devices, ensuring efficient data exchange and business continuity. Layer3 managed network switch TOP-S5800-52SX, features with All-Optical Ports and Redundant Dual PSU Modules hot-swappable. 10 Gigabit high-bandwidth uplinks, good for long-distance transmission. It can be used as aggregation device or access device, depending on the scenario. This design enables end-to-end optical signal transmission, avoiding the conversion between electrical and optical signals at the switch port level. The series provides enterprise-class Layer 2 and 3 switching, is designed for DNA Center and SD-Access management and automation, and includes an Enhanced Limited Lifetime Warranty (E-LLW). Support static routing, policy routing, rip, OSPF, BGP, MPLS and other three-layer routing protocols. Based on Huawei's Versatile Routing Platform (VRP), CloudEngine S5736-S supports enhanced Layer 3 features, simplified Operations and Maintenance.
