

Cambodia Broadcasting Optical Cable Project

Overview

Cambodia Fibre Optic Communication Networks Co., Ltd (CFOCN) has requested the Ministry of Public Works and Transport (MPWT) for approval to undertake a project involving the drilling and installation of new fibre optic cables across Cambodia's nine major provinces. The Sihanoukville-Hong Kong Submarine Cable connects Sihanoukville, Cambodia and Hong Kong, spanning approximately 3000km across the South China Sea. The two parties signed. An Environmental Impact Assessment (EIA) for the Land Cable Project in Khmer and an Environmental Impact Assessment for the Submarine Cable Project in English was prepared for the Project, and a Non-Technical Summary (NTS) of the EIA was prepared in English. Additionally, CFOCN has developed an. By building out the fiber optic cable backbone and the metro network across the country, the project is expected to support increased access to telecom services in both rural and urban areas. On the one hand, it will provide greater capacity for the operators in the telecommunication sector, and on. If provided by the financial institution, the Early Warning System Team writes a short summary describing the purported development objective of the project and project components. Review the complete project documentation for a detailed description. This request was discussed. (Yicai) Oct. 18 -- China Unicom Group, one of the country's largest telecommunications operators, will build Cambodia's first state-owned submarine optical fiber cable with a large capacity for international communications.
