

Cambodia Fiber Optic Communication Cable Blowing Project

Overview

Cambodia Fibre Optic Communication Networks Co., Ltd (CFOCN) has requested the Ministry of Public Works and Transport (MPWT) for approval to undertake a project involving the drilling and installation of new fibre optic cables across Cambodia's nine major provinces. The objective is to support the development of both the fiber backbone network and the metro network in Cambodia. By building out the fiber optic cable backbone and the metro network across the country, the project is expected to support increased access to telecom services in both rural and urban. By building out the fiber optic cable backbone and the metro network across the country, the project is expected to support increased access to telecom services in both rural and urban areas. This request was discussed. For example, "A" or "B" are risk categories where "A" represents the highest amount of risk. " Date when project documentation and funding is reviewed by the Board for consideration. There are now two submarine cable systems landing in Cambodia, the Malaysia-Cambodia-Thailand (MCT) and the Asia-Africa Europe 1 (AAE-1) cable systems.
