

Distribution box PW1

Overview

This box segregates switches from other components to avoid negative interferences. It can be mounted onto the 19" profiles exactly where required. Opening for up to 22 modules (18 mm). Single-channel NPN output ensures reliable signal transmission in industrial systems. Clear LED indication provides instant visual status monitoring for each channel. Wide-body PCB interface design allows for easy and secure. These Distribution Boxes enable decentralized installation of the electronics close to the load. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable. K2 Components has supported the Australian electrical and building industry for more than 20 years, operating out of our Adelaide base at Regency Park for over 40 years. The extensive history as an original equipment manufacturer within the automotive, mining, building and seating industries allows. best fits your space with under-floor or over-floor installations available • High-Density Power & Data Capability: Features a 4-circuit power system with quad receptacle devices and optional AV/ data capabilities • Reconfigurable: Location of power can be moved after installation with modular.
