

Emergency Handling of Optical Cable Breakage

Overview

Remove at least 10 m (32 ft) of cable on either side of the cut and use an OTDR to test the remaining lengths to verify that they are undamaged. (To save time, the restoration cable should already be stripped and loaded into the. Regardless of how well an outside plant optical fiber cable is installed, at some point it could be involved in a catastrophic accident. Optic fibre cables are suspended on traction masts. The cable is vulnerable to: a) Theft; b) Vandalism; c) Threes dislodging; d). Introduction This Program provides supervision, employees and safety managers with general safety rules, task safety procedures and best techniques for installation of quality fiber optic cable systems (cable handling, splicing, pulling, terminating testing and trouble shooting tasks). With CommMesh's advanced tools and solutions, you'll learn how to restore networks seamlessly. Let's explore the process and see why CommMesh.
