

Fiber optic patch cord FC interface APC to PC

Overview

To connect one device having FC/PC interface with one FC/APC interface, an option is to use a piece of optical patch cord that has FC/PC and FC/APC at its ends. FC/PC and FC/APC connectors are widely used in fiber optical devices, equipment and systems. It is a common problem many people have when they use those two types of connectors: those connectors can not join with each other, because their tips. Today, this post will introduce APC, UPC, and PC fiber connector types, which are classified based on the different angle polished fiber end face shapes. Next, the post will introduce the polish style, structure, difference, application, and usage attention of these connectors. Each type varies by shape, polish (APC, PC, or UPC), and return loss performance, which affect PC, UPC, and APC Polish Styles: What's the. A fiber optic patch cord, also known as a fiber optic patch cable or fiber jumper, is a length of fiber optic cable capped at both ends with connectors that allow it to be rapidly and conveniently connected to an optical switch, router, or other telecommunication/network equipment.
