

GT1410 optical module

Overview

This SFP module includes a receiver and a transmitter which facilitates the conversion of an electrical data signal into an optical signal for transmission over fiber, and will also receive an optical data signal for conversion to an electrical signal for further processing. Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module. This site helps you to save the Earth from electronic waste! If you get stuck in repairing a defective appliance download this repair information for help. This solution reduces customer design time, thus saving customer cost without compromising performance. The wide variety of modules gives you flexible and plug-and-play options for all types of interfaces. These compact optical transceivers offer a access and ring network, storage network, and. For over 30 years, MACOM has developed and manufactured the fastest, most sensitive and broadest wavelength photoreceivers available. Our experience in leading-edge technology allows us to provide products that easily integrate within customers' systems. This transceiver consists of two sections: The transmitter section incorporates a CWDM DFB laser. Digital diagnostics functions are.
