

How much does a 5000-meter fiber optic cable weigh

Overview

They can weigh between 60 to 200 kg per kilometer (39.7 to 132 pounds per 1000 feet), depending on the design and materials used. However, some general guidelines can provide a rough estimate: Indoor Fiber Optic Cables: These are typically lighter as they require less protection. Indoor cables can weigh anywhere from 10 to 30 kg per. Calculate cable weight from length and weight per meter, or estimate total weight by cable size, material, core count, and insulation. Lighter materials reduce overall cable weight 3. Explanation. rial environments. The cable is suitable for both indoor and outdoor installation. As we noted. The Optronics fibre optic cable range includes simplex, duplex and flat ribbon patchcords, tight buffered, single loose tube and multi-loose tube distribution cables for internal and external applications as well as many variations of armoured, aerial, rodent resistant and water blocked cables.
