

How to adjust the intelligent PDU network

Overview

To configure network settings, enter the appropriate “net” command and press Enter. All commands are case sensitive. Section 1 – System Overview Intelligent Network Controller The Panduit G5 Intelligent PDUs have an integral, hot swappable Intelligent Network Controller. The Intelligent Network Controller contains an OLED display, control buttons, USB Interface, Serial and Sensor ports, and a recessed Reset. Connecting the PDU to a LAN provides communication through an Internet or Intranet connection. You can monitor the PDU from any computer connected to the same network. The PDU is set to use DHCP (Dynamic Host Configuration Protocol) by default when delivered. If IP is successfully assigned, you. There are two ways to connect new PDUs to a network: using an individual IP address for each PDU, connecting directly to a network switch, or connecting through Conteg Spain's redundant network cascading architecture. SOLUTION: Conteg Spain PDUs can cascade 16 PDUs using a single IP address. The Geist™ Rack Power Distribution Unit (rPDU) gives data center managers the flexibility to install the intelligence required today, with the option to upgrade technology as needs evolve.
