

# How to hang cable trays on the ceiling

## Overview

The cable tray is installed with C-type ceiling suspension. The position of the expansion hole is the center distance of the screw (applicable to screws below M12). It contains the wires in a secure, tidy, and elevated state. The center distance of the screw is the cable tray width + 50mm (for example, for a W400mm cable tray, the center distance of the cross arm screw is 450mm);  $\Omega$  Bracket are fixed on the floor with 2PCS M8×55 heavy-duty expansions, and the expansion center. There are several threaded rod hanging options that can save you time and money. Several mounting options are available for wire mesh basket trays and cable trays, improving safety, ease of maintenance, and overall effectiveness. When mounting these trays, consider the following. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met.

## Article Content
