

Integrated Energy Cabinet for Mining IK10

Overview

These advanced enclosures deliver reliable protection for critical electrical and communication equipment in outdoor heavy-duty settings. Protection: IP66 IK10 (Non-ventilated); IP55 IK10 (Ventilated) Standards (& Conformities): IEC/EN 60529, IEC/EN 62208, EIA-310-D, RoHS, CE . Fiberglass-reinforced polyester cabinet, featuring a modern design, ideal for seamless integration with urban furniture. Fiberglass-reinforced polyester cabinet, for recessed or surface-mounted installation on an. METALLIC ENCLOSURES IP65 IK10 We manufacture different types of metallic enclosures are available such as floor-based cabinet type enclosures, wall-mounted or built-in placement, power transfer enclosures (low and medium voltage) and floor-based or wall-mounted pillar-type enclosures. Tested to international standards and trusted in demanding applications, this warranty reinforces our commitment to long-term protection and reliability. for immediate installation and use upon delivery. Dual Power. Due to the double-walled construction, it offers optimum protection of the sensitive installations against external influences and has a maximum impact resistance of IK10.

IK10 Rated Enclosures

Please note that while the enclosure itself is IK10 rated, latches and other external features are not. If an impact occurs, Integra recommends inspecting the enclosure and opening and closing the door to

IK10 Impact Rating Explained | Integra Enclosures

Learn why the IK10 impact rating is the gold standard for enclosure durability, ensuring your electronics are protected in the harshest environments.

Understanding IK Testing:

IK10 (20.00 Joules): IK10 is the highest IK rating, indicating enclosures with the utmost level of mechanical impact protection. They can withstand the most

IK10, BS EN 62262 standard for impact resistance

It provides a means of specifying the capacity of an enclosure to protect its contents from external impacts. IK10 classification is the highest vandal resistance rating

White_Paper_zu_IK_Schutzart_en

If a higher level of protection than IK10 is reached, the code is IK10+, regardless of the additional energy effect, with the standard recommending a value of 50 J (joules). The international IEC 62 262
