

Korean Figure-8 Optical Cable 4 Cores

Overview

Self-supported mini figure 8 fiber optic cable with 4 cores, steel messenger wire, and PE/LSZH jacket. Ideal for indoor/outdoor overhead installations with crush resistance. Singlemode 4 core figure 8 cables feature a very small core diameter—typically between 8 to 10 microns—allowing only one mode of light to propagate. This design minimizes. Optical fibres are housed in loose tubes that are made of high-modulus plastic and filled with water blocking yarns. The tubes (and fillers) are stranded around the central strength member to form a cable core. Characterized by its unique “Figure 8” profile, this cable incorporates a steel stranded wire as its self-supporting component, offering unparalleled tensile strength during both. 4 Core Armor Figure 8 Self Supporting Aerial Fiber cable GYTC8S Fiber Optic Cable Armor Stranded Loose Tube Steel Wire Strength Waterproof Figure 8 Self Supporting Outdoor GYTC8S is a typical self supporting outdoor fiber optic cable, suitable for aerial applications; The cable have nice moisture.
