

Metal mesh cable trays for information technology rooms

Overview

Wire mesh cable trays offer lightweight, flexible cable support, ideal for data centers, telecom rooms, and IT infrastructure. Their open structure allows for excellent airflow, easy cable entry/exit, and simplified maintenance. Good tray design helps with three things: Keeping cables cool so they last longer. Making future changes painless. That's why the decision isn't cosmetic. From hyperscale campuses and enterprise facilities, Marlin helps operators improve cooling efficiency, maintain clean. Snap Track® ventilated channel cable tray serves targeted applications within data center environments — auxiliary and support system cabling, retrofit and expansion projects, and facilities where industrial infrastructure intersects with IT operations. Madsen Steel Wire. Constructed from high-quality welded steel wire, Cablofil® Wire Mesh Cable Tray is the result of decades of research and over 94,000 miles of installed tray across the globe.
