

Price of PLC splitter

Overview

Modern PLC splitters typically range from \$20 to \$200, with pricing primarily influenced by the splitting ratio (1:2, 1:4, 1:8, 1:16, 1:32, or 1:64), insertion loss specifications, and manufacturing quality. FS PLC Fiber Optic Splitters, Bare/Blockless/ABS/LGX Splitter/Rack Mount Types, support 1xN light distribution, with low IL and PDL for high-reliability transmission. Deploying compact FS PLC Splitters to simplify your networks, perfectly fits your PON, EPON, FTTX, etc. These essential components, available at various price points depending on their splitting ratios and specifications, enable the efficient division. Optical Fiber Splitter is used to split the fiber optic light into several parts at a certain ratio. It is an important component used in Passive Optical Network (PON), therefore also called PON Splitter. There are mainly two kinds of PON Fiber Splitters: one is the traditional fused type splitter. A SPS-Splitter (Planar Lightwave Circuit Splitter) is a passive optical device used to divide a single optical signal into multiple outputs with uniform optical power. Please select the requested variation. The splitter is supplied ready. Explore our comprehensive selection of high-performance fiber optic splitters.
