

# Price of telecommunications towers

## Overview

Telecom tower pricing typically ranges from \$15,000 to over \$150,000 for the structure itself, heavily dependent on height, design type, and current global steel prices. The telecommunications tower market is a major contributor to the enhancement of mobile networks offering infrastructure support for wireless communication. Telecom towers, which are structures that carry antennas and other devices, are necessary to transmit cellular signals and provide a network. The Europe Telecom Towers Market size was valued at USD 14.38 billion in 2025 and estimated to grow from USD 14.12% during the forecast period (2026-2031). This growth unfolds as carriers offload passive assets to independent. A telecom tower is a freestanding mast, pole, free-standing tower, or other structure designed and primarily used for a public utility to support wireless telecommunications facility antennas.
