

Pxt type distribution box

Overview

PXT2 series protective rib distribution box PXT series, in line with GB7251. 3 standard, the main incoming component is dual power supply, molded case (leakage) circuit breaker or small (leakage) circuit breaker, and the outgoing switch is small (leakage) circuit breaker and. PXT distribution box is used in power plants, substations, factories and mines, high-rise buildings and other power users. They vary in terms of materials, including metal and flame-retardant plastic; installation methods, such as vertical, hanging, concealed, or exposed installations; and voltage levels, including 380V and 220V. The company specializes in manufacturing high and low voltage complete distribution equipment, gas detection and automated monitoring systems, power transformers, as well as a series of new energy products including solar power generation equipment, photovoltaic DC/AC combiner boxes, grid-connected. The utility model discloses a PXT distribution box, which comprises a box body, wherein a box door is arranged on one side wall of the box body, a plurality of heat dissipation fans are arranged on the box door, a plurality of heat dissipation holes are formed in one side wall of the box body. Atexdelvalle offers world-class explosion-protected solutions guaranteeing highest quality and performance with no compromise. Manufacture custom made Local Control Stations & Distribution Boxes, local control panel boards and stations, explosion protected control units, distribution. Modular GRP construction fitted with a variety of optional components. Enclosure for modular combination (Ex e). Main switch and branch switch are operated with external rotary actuator. Internal wiring to the terminal is complete.
