

Restore FSN11P fiber optic sensor to factory settings

Overview

To return settings to factory default, press and hold the SET and PRESET buttons simultaneously for 3 seconds until the setting display flashes "rSt". These sensors are designed to detect objects using a fiber optic cable. This manual provides instructions on how to install, configure, and calibrate these sensors. "Factory Default Setting (Default Value) List" on page 6-6. This is the operation indicator; this indicates the current detection status. Our mission is to provide users with easy access to these manuals at all times and from any location, enabling them to make the most out of. Full Auto Preset Function This function automatically differentiates between two conditions (presence/absence of workpiece) and adjusts the current values to " " and " ". Press and hold the button with no workpiece in. *2 One or two more units connected: -20 to +55 °C (-4 to +131 °F); 3 to 10 more units connected: -20 to +50 °C (-4 to +122 °F); 11 to 16 more units connected: -20 to +45 °C (-4 to +113 °F).
