

Tanzania Joins the Core Switch 1G

Overview

KAMPALA, November 13, 2025 — In an innovative move set to revolutionise how people send and spend money across East Africa, Rwanda and Tanzania have commenced bi-lateral discussions on technical modalities to link their national retail payment systems switches. Time-Sensitive Networking (TSN) is a set of sub-standards that enhance the existing Ethernet specification towards time synchronization and deterministic communication in switched networks according to existing IEEE 802. With a rich set of layer-2 configurable features, both at.
