

# The EXFO optical time domain reflectometer is not charging

## Overview

If damage is found, contact your supplier immediately. Verify that all components listed in the packing slip are present. Before initial use, fully charge the device's internal battery. Connect the provided AC power adapter to the power input port on the device (refer to Figure 3). The EXFO MAX-730D-SM8 is a high-performance Optical Time Domain Reflectometer (OTDR) designed for comprehensive fiber optic network characterization and troubleshooting. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form, be it electronically, mechanically, or by any other means such as photocopying, recording or otherwise, without the prior written consent of the publisher. Ensure that the ambient temperature in the location where you charge the batteries is within the specifications (the battery). The MaxTester 700B/C Series is the first tablet-inspired OTDR line that is handy, lightweight and rugged enough for any outside plant environment. The OTDR is a valuable tool for anyone who works with optical fibers.
