

The installation height of the distribution box is 0.3 meters

Overview

The bottom of an outlet box should be about 12 inches, or one foot (0.3 meters). This may change depending on the type of switch or outlet. Understanding why people place light switches and outlet boxes at certain heights can be important information for installing. Both sources stipulate that socket outlets, switches and controls should be installed at a height between 450mm and 1200mm above the finished floor level. End termination which is facilitated by using a proper armoured gland kit shall be supplied and installed by CEB. Cables that are not categorized as standard underground cables. ABB Mini Center Compact distribution board is the basis for development and growth in meeting all the demands for a successful future in residential, commercial, and infrastructure segments. 01 This specification covers the design, fabrication, painting and supply of metal cabinet, supply of components, wiring, testing at works, packing and supply on destination basis and performance testing of 11 kV, 22 kV & 33 kV self-equipped metering cubicle. Service between distribution.
