

Two-optical-two-electric fiber optic patch cord

Overview

A Dual Fiber-optic Patch Cord has two optically isolated fibers. One side ends with a dual ferrule guiding pin or a guiding socket connector. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of fiber patch cords and how to choose the right solution for your project – and how ZION can support you with stable quality, flexible customization. A Dual Fiber-optic Patch Cord has two optically isolated fibers. – and are used to connect IT hardware (e. switches, servers) equipped with fibre optic interfaces either directly. Get low-loss fiber patch cables & cords with various connector options that support fiber optic cabling up to 400G. The fiber optic patch cable must, therefore, be carefully considered. Behind its slender appearance lies the fusion of core types, connector types, and polish levels, each chosen for a specific application. Choosing the right cable thus boils down to educating oneself about fiber optic patch cable. Optical patch cords, also known as fiber optic jumpers, are indispensable in linking optical devices and ensuring efficient data transmission.
