

US Fiber Optic Network

Overview

The deployment of fiber optic networks in the United States has seen significant progress over the past few years. This growth is driven by both private investments and substantial government. RVA, LLC. Fiber-to-the-home (FTTH) deployment reached new milestones, with 76. homes now passed by fiber, representing a 13% growth. About 17% of US broadband subscribers use fiber optic connections, a modest adoption rate compared to many European and Latin American markets like France (67%) and Brazil (75%). But US telco fiber subscribers grew double digits in 2023 and made up about 63% of the entire telco subscriber base. This map shows where fiber internet service is available across the United States from all providers. Use the map controls to color by number of fiber providers or by maximum fiber speed available. These internet service providers play a vital role in delivering internet access to a diverse range of customers, from single-family households to businesses of all.
