

Xinhui Fireproof and Fire-resistant Channel Cable Tray

Overview

Designed to withstand extreme heat and prevent fire hazards, this innovative tray is perfect for both commercial and residential applications. Made from high-quality, fire-resistant materials, our cable tray ensures that your cables remain protected, organized, and safe. Fireproof bridge is mainly composed of glass fiber reinforced material and inorganic binder composite fireproof board and metal skeleton composite and other fireproof substrate. In addition, the use of high environmental protection pigment makes the fireproof coating on the cable tray non-toxic, with no pollution, and has. Expert Tip: For enhanced fire protection, consider combining open-style trays (like ladder or mesh) with fire-resistant blankets, intumescent coatings, or mineral-insulated (MI) cable wraps—especially in high-risk zones such as server rooms or chemical plants. Material Choice: Galvanized steel. Explore how organized MEP Cable Tray systems deliver efficiency and safety in modern structures. This case study focuses on the Wuxi Binjiang Community Center Project in China.
